DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-42, drawn to methods of synthesizing 2-chloro-9-(2-deoxy-2-fluoro- β -D-arabinofuranosyl)-9H-purin-6-amine, classified in class 536, subclasses 26.71 and 124.

Group II, claims 42-48, drawn to compounds selected from the group consisting of 2-chloro-9-(2-deoxy-2-fluoro- β -D-arabinofuranosyl)-9H-purin-6-substituent, where 6-substituent is selected from the group consisting of amino, protected amino groups, azido and alkoxy, classified in class 536, subclasses 26.8, 27.4 and 27.63.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, 2'-deoxy-2'-fluoroarabinofuranosylpurine compounds can be produced by a different method (Carson et al. (US 5,310,732)). See example 13. Therefore, the teaching of Carson et al. provide a process, which can be

Art Unit: 1623

used to produce 2-chloro-9-(2-deoxy-2-fluoro- β -D-arabinofuranosyl)-9H-purin-6-substituent.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
